

NEB-U-MASK® SYSTEMS

MULTIPLE THERAPIES, ONE SOLUTION

During an acute asthma attack, a patient may be given oxygen or heliox in combination with pharmacologic therapies. The challenge of this treatment strategy is the lack of a device that allows for the simultaneous delivery of medical gases and aerosolized medication. Low oxygen saturation has been correlated inversely with the rate of hospitalization¹, which puts caregivers in a difficult situation when faced with the need to remove the oxygen mask to facilitate a neb or MDI treatment.

Introducing the Neb-U-Mask, a combination device that allows for the concurrent delivery of aerosolized medications and high concentrations of oxygen or heliox. The system is composed of an innovative wye design featuring a nebulizer connection and MDI adaptor, a high concentration mask and a 750ml gas reservoir bag. The nebulizer connection features a valved port, which maintains a closed system when the neb is not in use.

Neb-U-Mask is available in both adult and pediatric versions, and is packaged with a Micro Mist® nebulizer and colored gas supply tubing to facilitate ease of use. The device nebulizes at angles up to 90° and features a swivel connector, allowing the system to be used in a manner that is most comfortable for the patient.

The Neb-U-Mask advances patient care and optimizes caregiver efficiency by allowing for an effective treatment strategy in emergency situations. Neb-U-Mask... Multiple therapies, One Solution.

¹ Initial oxygen saturation as a predictor of admission in children presenting to the emergency department with acute asthma. Keahey L et al – Annals of Emergency Medicine 2002

ORDERING INFORMATION

| ITEM CODE | DESCRIPTION | CASE QTY |
|-----------|-----------------------------|----------|
| 1895 | Adult Neb-U-Mask System | 20 |
| 1896 | Pediatric Neb-U-Mask System | 20 |

Latex Free

Rx Only

AT A GLANCE

FEATURES

- FDA approved for heliox and oxygen delivery
- Valved nebulizer port helps maintain a closed system at all times
- 360° swivel connector allows the system to be adjusted to the most comfortable position
- Nebulizer port and MDI adaptor allows treatment to be tailored to the patient's needs
- Color coded gas supply tubing increases safety
- Micro Mist® nebulizer delivers drug at angles up to 90°
- Individually packed 20 to a case
