ACCESSORIES

for use with the **Bone Injection Gun™**

B.I.G. Demo Training Kit Part # BIG-DKIT-A (Adult) / BIG-DKIT-P (Pediatric)

Refine IO skills using a reloadable, non-sterile adult or pediatric B.I.G. Training Kit. Multiple use application.

Kit includes: • Reloadable, non-sterile Adult or Pediatric B.I.G. • Safety latches
• Usage instructions • Tools for manual reloading • Training CD
• Foam block for needle insertions • Storage box

B.I.G. Reloading System Kit Part # BIG-RSYS-A (Adult) / BIG-RSYS-P (Pediatric)

Everything necessary for effective IO training is in this complete kit. Incorporates our B.I.G. Training Kit with our Reloading Device. This kit is great for group training sessions. Multiple use application.

Reloading System includes: • Reloading device • User manual • Carrying case
• Training CD • Non-sterile Demo B.I.G. (Adult or Pedi)
• Foam block for needle insertions • Additional safety clips

BIGBAG Part # BIGBAG

Organize and keep your IO items in this compact “crash cart” kit. Our orange bag accommodates 2 sterile B.I.G.s (*not included*) and has storage space for a syringe, alcohol/iodine preps, IV set, tape, etc. Colorfully illustrated site location cards reference adult and pediatric tibial placement.

B.I.G. Anatomical Adult Training Leg Part # BIG-TLEG

Simulate tibial IO placement and identify proper landmarks with our adult training leg. Students can use this durable leg (*including replaceable skin and cartridge*) during training and practicals. This anatomical leg is designed with a palpable tibial tuberosity and can be used with any IO device for tibial placement.
