

Connect Front Line Crew with Maintenance Staff

Manage scheduled maintenance and ad-hoc repair requests efficiently. Vehicle inspections captured through an electronic check sheet automate repair requests easily.

Maintain complete visibility of services due, work orders in-process, and the detailed history for each vehicle. Analyze spending and total cost of ownership with detailed and holistic reports.

IMPROVED SCHEDULING

Plan and track fleet maintenance by creating PM schedules based on your vehicle types. Trigger service from odometer, vehicle hours, days, or months. Use VMRS coding to standardize maintenance and report on fleet parts and labor trends.

LOOP CLOSURE

Crews can submit work orders in the same place they complete their inspections and receive status updates for work order resolution. Achieve better communication, informed & connected staff, and service-ready vehicles.

3

TELEMATICS AUTOMATION

Our fleet telematics integration with Geotab allows for automated data capture from the vehicle's OBDII port. Get accurate odometer readings, GPS locations, trip history, idle-time, fuel usage, engine error codes, and driver behavior wirelessly.
